Residence Requirements

The four-year Bachelor of Fine Arts and Certificate of Fine Arts programs in the School of Film/Video require a minimum of two years fulltime study in residence. The Master of Fine Arts and Advanced Certificate of Fine Arts programs require three years in residence (see [CalArts Residence policy](#)). On rare occasions, the full faculty may recommend an earlier graduation (see [Accelerated Graduation policy](#)).

Curriculum Requirements

I. Bachelor of Fine Arts and Certificate of Fine Arts

Forty-six semester units of Critical Studies coursework are required of all BFA candidates; specific Critical Studies requirements are detailed in the Critical Studies section of this Course Catalog (see [Critical Studies requirements](#)). Certificate of Fine Arts candidates are not required to complete Critical Studies coursework; all other curriculum and course requirements for the Certificate of Fine Arts are identical to those for the BFA.

All required courses must be completed satisfactorily. Students must complete the program of studies agreed upon by the mentor and the student, and all required courses herein specified.

Students are required to complete a Mid-Residence Review and a Graduation Review (see [Reviews policy](#)). Work-in-progress must be submitted for faculty review at the time of the student's Mid-Residence Review. Final project(s) are submitted at the time of the Graduation Review. Information regarding Mid-Residence and Graduation Review procedures and timing is available in the School of Film/Video office.

II. Master of Fine Arts and Advanced Certificate of Fine Arts

Graduate students must demonstrate proficiency in graduate-level techniques and concepts. Students must pass the required courses or the equivalent before being allowed access to the facilities and equipment needed for independent work.

Graduate students must submit a thesis project proposal at the Preliminary Review, during the third semester of residence. The proposal must be approved by the faculty review committee as sufficiently challenging to merit the Master of Fine Arts degree or Advanced Certificate of Fine Arts.

Completed graduate thesis films or videotapes must be presented, and the students must participate in a Graduation Review. Final approval for graduation is awarded by the faculty review committee.

Information regarding Preliminary Review and Graduation Review procedures and timing is [available online](#).

III. Integrated Media Curriculum (Graduate Only)

See [Center for Integrated Media curriculum](#).

I. Program in Film and Video Requirements

Learning Goals

The Program in Film and Video has a required core curriculum for both undergraduate and graduate degrees. The BFA program is designed to provide students with a full range of technical and practical skills, to teach them to think critically about their chosen mediums, and to guide their artistic growth as they experiment with different forms of cinematic expression. To this end, undergraduate students must successfully complete a series of required classes during each of their years in the program. Academic and artistic progress is assessed at a Mid-Term Residency Review during the student's 3rd semester. In order to graduate, undergraduate students are again fully evaluated and must successfully complete a Graduation Review in their final semester.

The MFA program offers an intense and intellectually charged curriculum which inspires and requires students to immerse themselves in the production of new work. During the course of three years, graduate students are expected to achieve technical expertise, to gain historical and critical perspective in their area of focus and to produce a substantial body of work.

In their first year, graduate students are required to take a full schedule of foundation classes which include technical and production workshops as well as classes in history, theory and criticism. Students are expected to meet regularly with appropriate faculty as they begin to produce work. In their 3rd semester, graduate students must propose and gain approval for their thesis project at a Preliminary Thesis Review. This provides the next year and a half for the production and completion of their thesis film, video or installation. Graduates are encouraged to work closely with faculty by taking a number of independent studies in their final year. Graduation is contingent upon the successful presentation and evaluation of their thesis project during a Graduation Review at the end of their final semester.

BFA3 AND BFA4

Undergraduate students are required to take Undergraduate Critique (F 340) for at least 2 semesters during their final 2 years of residence. During these final two years, undergraduate students are expected to either produce a senior project or contribute substantially to a number of student projects in one of the following capacities: cinematography, editing, production or sound design.

Incoming Undergraduate Students are required to take both semesters of Film History (CS175A&B). Students who enter as BFA1 are required to complete 3 years of film/video history, theory or criticism courses. Transfer students are required to complete 2 years of film/video history, theory, or criticism courses. A list of classes that satisfy this requirement is available at registration each semester.

Undergraduate Students are required to take at least one Visiting Artists Workshop during their 3rd or 4th year.

Required Courses for Incoming Graduate Students

- F501 Filmmaking Fundamentals (fall)
- [F103 Cinematography \(fall\)](#)
- [F126* Video Production Workshop \(fall\)](#)
- [F134* Digital Editing: Avid to Blu-Ray \(fall\)](#)

- [F153 Structuring Strategies/Artists Presentations \(fall and spring\)](#)

*Satisfactory completion of these classes are a prerequisite to individual access to equipment and use of facilities for independent projects.

Graduate Students are required to take at least one semester of Film History (CS175A or B) unless exempted by instructor based on prior education. Graduates are also required to take one semester of Film Today (F 114A or B).

Graduate Students are required to complete at least one Film/Video theory, history or criticism class each semester for 5 semesters. A list of classes that satisfy this requirement is available at registration each semester.

Graduate Students are required to take at least one Visiting Artist Workshop.

Graduate Students are required to leave a copy of their Thesis Project for the CalArts archives.

II. The Film Directing Program (MFA Only)

The Film Directing Program (FDP) is a unique three-year graduate course of study examining the broad spectrum of independent narrative cinema. The Master of Fine Arts and Advanced Certificate of Fine Arts programs require three years of residency to complete the degree.

Completion of a three year residency allows a full experience of craft, artistry, experimentation and critical thinking. FDP artists hone their powers of observation, work closely with actors, develop visual strategies and discover methods for shaping stories—both invented and adapted—that are emotionally true and dramatically credible.

The three year residency begins with two semesters of required foundation work in which the student builds skills; experiments with narrative technique and process; and conceives, shoots and edits a short film project. The following four semesters are comprised of the remaining graduation requirements including 6 metier directing classes, 2 special topic seminars, and 3 elective courses from across CalArts, all of which culminate in the final thesis: an aspirational film demonstrating a highly developed directorial point of view. Guided by their mentor, students develop their second and third year curriculum from a slate of courses designed to progress individual artistic development.

Mentorship plays a significant role in the Film Directing Program curriculum. Students are assigned their mentor at the point of admission. This faculty member guides the student through practical matters and becomes a vital collaborator during the student's artistic journey at CalArts (See [Mentoring policy](#)).

Students must successfully complete a Preliminary Thesis Review and Project Approval in the third semester to progress to the thesis project. A Graduation Review will be held in the final semester to review the thesis project. Graduation is contingent on a successful review of the thesis work and completion of all Film Directing Program course requirements.

Scheduled classes are supplemented with a Guest Artist Workshop program. Recent guests have included directors James Mangold, Haile Gerima, Aurora Guerrero, Ramin Bahrani, John Greyson, Peter Medak, The Polish Brothers, Rodrigo Garcia, Lance Hammer and Jim Finn, actors Ed Harris, Ewan McGregor, Joseph Gordon Levitt and Annette Bening, Academy Award winning composer David Shire, producers Ted Hope, Effie Brown and many others. The Guest

Artists change each year.

All students are encouraged to learn experientially by creating work beyond that assigned by faculty, by participating fully in a community of artists and by discovering their own directorial process. The Film Directing Program's primary efforts are guided by a mission to excite, challenge, and nurture artists to create compelling, authentic and unique work.

Learning Goals

By graduation, MFA students in the Film Directing Program should have developed the following skills and competencies:

- The ability to tell a story visually that is dramatically and emotionally compelling;
- A distinct directorial voice;
- Comprehensive filmmaking ability, as evidenced by the thesis project;
- The demonstrated ability to lead a team of both performance and production artists toward the shared goal of a finished film;
- An understanding of the processes and systems by which work might be conceived, produced and completed, as well as an awareness of the resources and opportunities available to independent filmmakers.

Film Directing Course Requirements

First year requirements provide necessary fundamentals. The second and third years are comprised of minimum 6 métier classes, minimum 2 special topics seminars, and minimum 3 electives selected by the students, in collaboration with their mentor, from a list of courses designed to challenge, enhance and develop artists who work in authentic and compelling narrative forms.

MFA 1 Required Classes and Modules

In the first semester, FDP students will participate in modular workshops that teach technical and production fundamentals, dramaturgy and the craft of directing actors. Courses in history, theory and criticism are also required. The second semester advances exploration of this work in structured classes and projects. Students are expected to meet regularly with appropriate faculty as they begin to produce work.

III. Program in Experimental Animation

The Experimental Animation Program offers both BFA and MFA degrees. A broad range of animation approaches, processes, compositing techniques and digital filmmaking methods are covered in a series of workshops, classes, lectures, seminars and independent studies. At the advanced level, students will choose their own tools and methods.

The program supports 2D animation, stop motion, CG, installation, performative animation, programming, and other filmmaking techniques, approaches, and outcomes. There are several technical courses attached to the different areas of production. Students must successfully complete these courses in order to gain access to related facilities. The sequence of these and other advanced elective classes is established in consultation with the student's mentor.

Learning Goals for BFA Students

Creative development:

Student has devised a creative process that includes well-developed animation and filmmaking skills, and development of a distinctive voice.

Individual voice:

Student's style is recognizable and compelling. Their work shows substantial creativity and an in-depth development of independent ideas.

Contextual knowledge:

Student is aware of and can critically discuss current developments in time-based art as well as being cognizant of past developments in animation and filmmaking history. Is able to demonstrate his/her advanced understanding of historical/cultural/social context of his/her work convincingly in presentations, discussions and writing.

Digital skills:

Student applies techniques appropriately and with confidence, and combines different techniques in a meaningful manner to achieve a desired outcome. Student is able to explain the process and help others in solving problems.

Communication and critical skills:

Student can convincingly argue an idea that is not in accordance with opinions of others. Student listens and responds to what was said. S/he uses knowledge effectively in his/her arguments and takes other people's opinions seriously. S/he has successfully worked with others on projects.

Professionalism:

Student's personal work exceeds expectations. Student is able to give professional presentations and understands professional etiquette. Student's work is goal oriented, organized and student is able to work well under pressure. Student has a good relationship with faculty, and frequently supports peers with valuable information and/or help.

Learning Goals for MFA Students

Creative development:

Student has advanced ability in all aspects of their creative work. The student has developed accomplished animation and filmmaking skills. Their thesis project shows a highly distinctive voice, whose artistic work is at a fully professional level.

Individual voice:

Student's thesis is informed, innovative and powerful. Unique combinations of ideas and techniques are used to make highly original work.

Contextual knowledge:

Student has perceptive critical skills, is aware of and can critically discuss the historical, social, and cultural aspects of their own work and their place within the art world, the animation world, and the world of time-based art.

Communication and critical skills:

Student is fully able to work with others as a collaborator and advisor, and is an effective director.

Digital skills:

Student's ability to use key technical equipment, software and digital processes surpasses that of most, to the extent that he or she could be called upon to teach others. Advanced understanding and innovation is evident in their thesis project.

Professionalism:

Student is sought out by others because of his/her high degree of professionalism and expertise. Has a wide range of contacts and has begun integration into the larger arts community. His or her presentations are stimulating. S/he understands and practices good professional etiquette. Student is able to meet personal and artistic goals, is organized, and able to work well under pressure. Student frequently supports peers with valuable information and/or help and has a good relationship with Faculty.

Bachelor of Fine Arts Program in Experimental Animation

The first two years of the four year Bachelor of Fine Arts Program in Experimental Animation consists of required classes designed to help the student gain an understanding of principles in animation along with understanding of the history of art, experimental animation, foundation courses in animation practices, digital filmmaking and sound techniques, concepts and Critical Studies.

Each BFA student will present and discuss the work they have produced during a required Mid-Residence Review in the fall semester of the student's third year. The Mid-Residence Review will be scheduled by the Film/Video office. The student will also discuss plans for their senior project during this review. This review is supplemented in following years through evaluation meetings between the student and mentor.

The BFA student is required to produce and complete a Senior Project in their fourth year and that project, along with other significant work will be evaluated during the student's Graduation Review in the last semester of residence.

Master of Fine Arts Program in Experimental Animation

The residence requirement for the Master of Fine Arts Program in Experimental Animation is three years providing necessary time for students to participate in the full range of studies affecting animation.

Students are exposed to a comprehensive education in the history, concepts, technique and technology of animation arts. They also learn skills necessary to conceive, design, and produce a complete thesis project.

This first year of required courses is designed to help students gain comprehensive understanding of the history of animation, animation practices, digital filmmaking techniques and concepts in Experimental Animation.

Through experimentation and conceptual investigation, second year students develop a thesis project in the Thesis Concept course and in consultation with their mentor and other faculty to be submitted during the Preliminary Thesis Review. This review typically occurs during a student's third semester. During the Preliminary Review students will present and discuss their proposed thesis project with a faculty committee. This meeting establishes an agreement on the goals of the project. The conceptual development of the thesis will parallel studies focusing on advanced technical and conceptual courses that support the production of the thesis.

Third year MFA students are required to produce a thesis project to graduate. In their third year, students focus most of their concentration on producing a thesis project under the tutelage of their mentor and other faculty, while participating in the Thesis Production Seminar. The Graduation Review is held near the end of the final semester. Students present the completed thesis project for review by the faculty review committee.

Required courses for Master of Fine Arts in Experimental Animation:

*Incoming MFA students must attend the first class in order to gain access to the computer lab. They will be given the opportunity to pass out of this class based on their prior computer/software experience.

** Unless exempted by instructor based on prior education.

Integrated Media students must complete *Seminar in Animation History* or an equivalent film history/theory or criticism course approved by their mentor.

IV. Character Animation Program

Learning Goals for the Character Animation Program

- The ability to tell compelling, visual stories, both time-based and static, using animated actors;
- A developed personal aesthetic, utilizing strong 2D and/or 3D animation techniques;
- Advanced understanding of film and theatrical production principles, such as directing, acting, editing, screenwriting and producing;
- A demonstrated breadth of advanced animation skills, including conceptual framing; visual observation; highly developed ability in either 2D or 3D technique with proficiency in the other; story development; layout, design and color; locomotion; character improvisation; sound design; and drawing;
- An understanding of and appreciation for the history of animation and its artistic / cultural contexts;
- The ability to relate critically, creatively and collaboratively to the other artistic disciplines at CalArts, as evidenced by a broad contextual grounding and participation in the greater arts landscape and the world of ideas; and
- The ability to function effectively as a professional artist in a variety of work settings, as demonstrated by (1) the ability to communicate verbally, visually and in writing; (2) demonstrated willingness to work collaboratively as part of a creative team, as well as entrepreneurially as an individual auteur; (3) participation in one of the Program's professional practices workshops; and (4) a demonstrated work ethic and commitment to the craft through the timely completion of coursework and projects.

The Character Animation Program is limited to undergraduate study and offers a comprehensive four-year curriculum for traditional and CG animation artists. Required courses are:

CS175A: Film History I - 1895-1950

3 units / Semester: I

Film History I is a survey of the development of the cinema from its origins in the late 19th century through the onset of the Second World War. The course will emphasize the development of cinema aesthetics through the study of works by major filmmakers, from the Lumières, Méliès and Porter to Renoir, Ozu and Welles. Requirements include regular attendance, weekly readings, weekly short papers and a final research paper. Purchase of a course reader is mandatory.

- * Required of all PFV MFA-1 students (1 semester, either A or B) and incoming BFA students (year-long, A&B)
- * Required of Experimental Animation BFA-2 students (year-long, A&B).
- * Required of FDP MFA-1 students (year-long, A&B)
- * Permission of instructor required.
- * May be repeated for credit.
- * Cross disciplinary class.
- * Open to the Institute.

Discipline(s): [School of Film/Video](#), [School of Critical Studies](#)

CS175B: Film History II - 1950-Present

3 units / Semester: II

A survey of the cinema from the end of the Second World War to the present. The course traces the impact of the Italian neo-realists upon the development of post-war aesthetics, following the movements that came in their wake, the filmmakers who carried on their legacy and those who rejected it. The story is framed through the study of works by major filmmakers, from Rossellini and DeSica to Godard and Varda, Ford and Hitchcock to Cassavetes and Burnett. Requirements include regular attendance, weekly readings, weekly short papers and a final research paper. Purchase of a course reader is mandatory.

- * CS175A is highly recommended but not a prerequisite.
- * Required of all PFV MFA-1 students (1 semester, either A or B) and incoming BFA students (year-long, A&B)
- * Required of Experimental Animation BFA-2 students (year-long, A&B).
- * Required of FDP MFA-1 students (year-long, A&B)
- * This class meets during the practicum/interim: ALL students are required to attend the first week of class with no exceptions.
- * May be repeated for credit.
- * Cross disciplinary class.
- * Open to the Institute.

CS272: Prostitution in Film

3 units / Semester: Not planned for this academic year

The course will view films and read texts that center on the prostitution, 'the world's oldest profession'. Prostitution has been a subject of singular fascination since biblical times—we will consider the construction of prostitution in a range of cinema, including mainstream work, alternative experimental fiction, as well as documentary films. Our investigation will necessarily intersect with question of the representation of sexuality, and exploitation in a more global sense.

* Open to the Institute.

Discipline(s): [School of Film/Video](#), [School of Critical Studies](#)

CS275: History of Experimental Film

3 units / Semester: Not planned for this academic year

A survey of experimental a.k.a. avant garde film from the 1920's to the 1970's. Dominant traditions to be examined include: Dadaist and Surrealist cinema of the 1920's, Trance films and Psychodramas of the 1940's and 50's, the Mythopoetic cinema of the 1960's, and the Structuralists of the 1970's. Eroticism, narrativity, urban portrait, collage, and the impulse toward subjectivity and diary are additional themes forms and genres we will investigate

* Permission of instructor required.

* May be repeated for credit.

* Cross disciplinary class.

* Open to the Institute.

Discipline(s): [School of Film/Video](#), [School of Critical Studies](#)

CS276A: History of Animation BFA

3 units / Semester: I, II

A yearlong international historical survey of animated films, from early motion devices through the development of studio shorts and features, the styles of experimental artists in various media, and current day applications of animated imagery. Lectures and readings stress the historical contexts of the topics covered, as well as the role of the researcher in historical documentation. This course replaces CS276 Animation Then and Now and FE333 The History of Experimental Animation as a BFA1 and BFA transfer requirement.

* Required of Experimental Animation BFA1 and BFA transfer students.

* Approved for Critical Studies.

* Open to the Institute.

Discipline(s): [School of Film/Video](#), [School of Critical Studies](#)

CS570D: History of Video Art

3 units / Semester: II

This course will survey video art and alternative media practice following the introduction of portable video recording equipment in 1967-68. It will examine early video projects responding to a radical late 60s shift in cultural strategies where perceptual process and performance were often valorized over art product; artists explored properties of the electronic signal; and media consumers and grassroots documentarians were approached as potential producers in efforts to democratize telecommunications. The course will examine video work from the 1980s through mid 90s that registered theoretical shifts from post-minimalism to post-modernism together with the impact of new subjectivities. And an examination of the impact of digital technology in the mid90s will introduce new media and the net cultural environment. Readings will focus on critical texts and writings by artists. A few short writing projects will be assigned.

* Open to both undergraduate and graduate students.

- * Permission of instructor required.
- * Cross disciplinary class.
- * Open to the Institute.

CS570I: Questions of Third Cinema: Films of the Global South

3 units / Semester: II

The concept of 'Third Cinema,' coined in Latin America by filmmakers Fernando Solanas and Octavio Getino, implies a critical reappraisal of the national or cultural specificity, post-colonial identity, the dialectical connection between domination/subordination, centre/periphery and resistance/hegemony. While First Cinema is Hollywood, Second Cinema is Western 'auteur' cinema, Third Cinema is resolutely non-capitalist and non-Western. We will look at films from Africa, the Arab World, East India, Latin America, Taiwan...but also films that assert a cultural/political resistance within Western industrialized countries, such as African American cinema, the Black British workshops and the 'Beur' films in France.

- * Assignment: one paper a week.
- * Permission of instructor required.
- * May be repeated for credit.
- * Open to the Institute.

Discipline(s): [School of Film/Video](#), [School of Critical Studies](#)

CS570N: Cinema Against the Grain

2 units / Semester: II

Now that the cinematic present is dominated by previews for video games and theme park rides, and the cinematic past threatens to congeal into AFI's greatest hits lists, it is particularly important to examine under-appreciated, even disreputable films that have gotten lost in the shuffle. 'Cinema Against the Grain' presents (mostly) independent films in historical context and deals with the themes and formal strategies of works that have thus far been refused a secure place in the canon. Screenings include films directed by Oscar Michaeux, Rowland Brown, James Bidgood, Fred Halsted, Doris Wishman and others. The requirements for the course are a paper per week, attendance at lectures and readings from photocopied articles and books on reserve.

- * Open to the Institute.

CS576: The Tracking Shot in Kapo - Aesthetics and Politics in the Cinematic Representation of Death, War, Destruction and Violence

3 units / Semester: Not planned for this academic year

Look however in Kapo, the shot where Emmanuelle Riva commits suicide by throwing herself on electric barbwire: the man who decides at this moment to make a forward tracking shot to reframe the dead body carefully positioning the raised hand in the corner of the final framing this man is worthy of the most profound contempt. This seminal text by Jacques Rivette marks a turning point in film theory and criticism, opening the door to a critical investigation on how the form of a film is producing as much discourse as its expressed content. The shot is at the center of any critical discourse on cinema. By returning to the basics of what a shot can do and cannot do, as well as the theoretical and ideological applications of the way it is composed and articulated within the frame, in relation to the off-screen space and the camera movements, we will investigate what it is at the heart of the production of meaning in modern cinema. Here we will take the notion of modernity in the wake of authors such as Jean-Luc Godard (for whom the history of cinema is divided into two: before and after concentration camps) and Gilles Deleuze (who locates the birth of cinematic modernity in post-war Europe). It becomes clear that a crucial combination took place (as noted by Paul

Virilio) when the apparatus of cinema met with the apparatus of mass killing during WWII.

- * Elective for Critical Studies Masters in Aesthetics and Politics
- * Permission of instructor required.
- * Open to the Institute.

F 210A: Documentary Production

2 units / Semester: I, II

This course explores the documentary form through theory and practice. Students will look at different documentary approaches and methods. Viewing and analysis of various films will be a vital part of the class; however, the main emphasis of the course will be on documentary production.

- * Enrollment limited to 12.
- * Open to Art/Photography students.
- * Permission of instructor required.

F 230: Editing Aesthetics

2 units / Semester: Not planned for this academic year

The class focuses on the aesthetics and practical techniques of film editing, including an exploration of structure and formats in experimental, documentary and narrative forms, sound elements, film maker's POV, performance, and post-production management. Students are required to bring a work or works in progress that they will be editing over the semester. The class functions as an editing workshop with critique and feedback, as well as studying existing works.

F 235: Sound T.A. Course

2 units / Semester: I, II

Class coincides with work/study in Film/Video Sound Department and provides an intensive introduction to the theory and practice of the modern post-production sound facility. The class covers principles of the sound facility and its components and systems used for transfers, mixing, telecine, sound effects, digitizing, sample-rate conversion, etc.

- * Enrollment limited to 12.
- * Permission of instructor required.
- * Cross disciplinary class.
- * Open to the Institute.

F 270: Screenwriting

3 units / Semester: I, II

A two-pronged approach to screenwriting for both fictional & non-fictional (documentary) narratives-utilizing the construction of a solid narrative (this can also be in documentary form) combined with the creation of believable, compelling characters who propel that narrative forward. Primarily a workshop, with the guidance of the instructor and open class discussion, each student will write a first-draft feature-length screenplay over the course of the semester. Writing begins immediately. Additionally, we will explore what makes movies work (or not) by viewing and analyzing films that are examples of great or not-so-great screenwriting.

- * Enrollment limited to 12.
- * Priority given to upper level students.
- * Permission of instructor required.

F 272: Optical Printer: Advanced Projects

2 units / Semester: Not planned for this academic year

An advanced printer class for students who are either ready to begin a new printer film or are already in the midst of one. This class will include both technical instruction and aesthetic discussion. Students will look at and discuss work in progress in addition to screening and analyzing a multitude of printer films. Students will be expected to complete a short film or make significant progress on a longer one.

F 273: Acting Bad

3 units / Semester: Not planned for this academic year

A course to de-construct acting and narration. The main goal will be to define performance in new, non-traditional ways. Students will develop dialogues and/or narrations taken from real life (court transcripts, overheard conversations) to

fictional (soap operas, novels) and poetic texts. These texts will then be performed in class emphasizing a multitude of executions. Each performance will be recorded on video, studied and then re-performed.

F 290: Finishing Your Thesis - Image Post-Production

2 units / Semester: Not planned for this academic year

A practical methodology and technology course designed to take the student through the post-production process to the completion of a finished work. Students are required to bring their thesis work in progress to view and discuss. The course will cover tools and techniques needed in the visual post-production process, such as color correction, and advanced digital film editing concerns, and will also serve as the access pathway to post-production stations such as the FCP/IO on-line suite and the Avid off-line suite. Additional lab time will be required for anyone seeking independent access to post-production equipment.

- * Prerequisite: F 104A&B (Film Production Workshop), F 126 (Video Production Workshop) and F 134 (Digital Editing: Avid to Blu-Ray Workshop).
- * Required for HFPADL access to Avid off-line suite(s) and FCP/IO on-line suites
- * Recommended for PFV MFA2 and MFA3 students
- * Permission of instructor required.
- * May be repeated for credit.

F 297: Alchemical Cinema

3 units / Semester: II

This course offers an introduction to the mysteries of photographic film-its properties, processes, and potentials. Technique is introduced as an organic component of the expressive arsenal. Everything is DIY and low-tech, as students hand-process films utilizing a variety of easily available tools and chemicals. B/W and color developing, reversal and negative, and high and low contrast emulsions will be explored from an artist's perspective. After learning the basic principles of photochemistry, students will be presented with an array of non-standard techniques, ranging from cross-processing to Rayographs and different methods of film distress-all transforming commonplace materials into cinematic magic.

- * Enrollment limited to 12.
- * Priority given to PFV students.
- * Permission of instructor required.

F 298: Devices of Illusion

3 units / Semester: I

This is a hands-on course in which students adapt, modify, reconfigure and boulderise optical and mechanical devices, creating mysterious machines for recording the ephemeral. Projects include but are not restricted to the creation of stereographic images and anamorphic distortions, dissection of cameras and projection of ghostly illusions. Our investigations will be supplemented by historical lectures, technical demonstrations and philosophical discussions concerning the extraordinary aesthetic possibilities of perceived motion and space. Students will create projects using still and motion picture film.

- * Prerequisite: F 104A&B or F 108
- * Enrollment limited to 15 by permission of instructor.
- * Permission of instructor required.
- * Cross disciplinary class.
- * Open to the Institute.

F 301: Intermediate Digital Production and Post

2 units / Semester: I, II

Students will be exposed to video production and post-production methodologies necessary for becoming self-sufficient video makers within the CalArts environment. Various methods of digital production and post-production will be covered, with special focus on best practices for production with Sony EX and Canon DSLR cameras, as well as finishing within the CalArts post path. Both the technical and aesthetic ramifications of video production and post will be covered.

- * Prerequisite: F126 & F134.
- * Open to PFV students.
- * Enrollment limited to 14 students.

- * Permission of instructor required.
- * Pre-requisite.

F 302: Film Lighting Workshop

2 units / Semester: II

A ten week workshop covers a range of film/video studio lighting practices, concepts and styles. After an introduction to lighting equipment and basic principles of light manipulation, various production scenes are staged to illustrate the required lighting set-ups. Viewing lighting strategies of master cinematographers on the screen widens the understanding of visual styles as they serve the creative concepts in telling a story. This workshop will be taught by Kris Malkiewicz in the first ten weeks of the second semester.

* Enrollment limited to 10 and limited to upper level Program in Film and Video students and Film Directing students, by permission of instructor.

- * Prerequisite: F 103.
- * Enrollment limited to 8 and limited to upper level Program in Film and Video students.

F 337: Experimental Film Techniques II

2 units / Semester: II

This class is a continuation of Experimental Film Techniques I and priority will be given to students who were previously enrolled. However, this class is open to all and should be taken by any PFV student who is planning to finish a film on film. Experimental Film Techniques II will continue to explore and experiment with methods for manipulating the film image, but will also include a series of in-depth presentations concerning laboratory procedures and the technical steps involved in completing a film on film. Equal emphasis on shooting and completion processes with lots of experimental film viewing as well. Students will be encouraged to shoot and complete a short 16mm film. Students must shoot a minimum of 3 rolls of film..

- * For Program in Film and Video students only.
- * Prerequisite: F 104A&B OR F 108A&B.

F 341: Cinema of Transformation

3 units / Semester: Not planned for this academic year

The course will view films that are, in very different ways, centrally concerned with inner life, faith/lack of faith, and various forms of transformation. Although film is a visual medium, and these films are without exception beautiful and powerful visually, they point to experiences which touch the deepest core of our invisible spirit. We will view work by Tarkovsky, Bresson, Parajanov, Cocteau, Bergmann...and many others. The reading combines theoretical/critical texts, fiction, and Jungian theory of transformation.

F 346: Documentary Inquiryies- Performance, Witnessing, and Restless Archives

3 units / Semester: I

This course will investigate a broad range of media art and documentary projects, with attention to the performative act of witnessing, the creative address of media archives by artists, and the aspiration to negotiate new social relations with collaborators and audiences. Drawing from work in film, video, and new media, this course will explore time-based projects informed by documentary gestures such as journaling, cinema-verite recording, surveillance, re-performance, and non-linear structuring of information. Narrative and performative projects resulting from creative detours in documentary exercises will also be screened. The course will additionally examine collections of work from specific historical moments that aspired to strategic cultural interventions, including a range of provocative work across genre on incarceration in the U.S., samizdat and media arts projects produced during late 1980s, dramatic cultural shifts in east central Europe, and collective experiments with new technologies and audiences from the U.S. in the 1960s/early 70s. Media projects from Chile, Nunavut, and South East Asia address generational loss or repression of archived information and reinvigorate dialogues across the distance of time.

F 373B: Los Angeles: A City on Film

2 units / Semester: Not planned for this academic year

Los Angeles, it seems, continues to fascinate people around the world although its time as 'the city of the future' has long passed. Is it simply because of the movies? Because it has been the production center of the American motion picture industry for almost one hundred years, images of the city have been projected into the minds of many million people throughout the world. In the early days of the movies, these images were used to promote a city that had nothing to sell except itself. When the city lost its self-confidence in the 1960s, these images turned darker but they became even more fascinating. If the city of the future had failed, how could the cities of the past survive?

So Los Angeles has become a proving ground for the intersection of movies with the real world. This two-semester course will survey how the city and its people have been represented on film from the 1920s to the present, offering a case study in the relations between representation and reality. Hollywood film-makers have often misread and misrepresented the city and its history in various ways. Most 'true', valid, and useful images' (to quote Wim Wenders on Ozu) of the city come from marginal practices of film and video making. The possible explanations for this situation are worth pondering. Film-makers will discuss the works presented whenever possible. Course credit available for each semester separately.

F 405: Writing About Film

3 units / Semester: I

The class will teach students how to write about film (as well as video and other media using the moving image) in a variety of forms, genres, and contexts: writing about one's work, about the work of peers, reviews of films seen in commercial theater, critical essays, academic papers, filmmaker's interviews, press releases, grant proposals etc. Examples of writing about film will be handed out and discussed. Sequences of classical, contemporary, foreign and experimental film and videos will be screened in class and analyzed using the proper descriptive and critical vocabulary. Major critical approaches to film and video will also be discussed. In addition each student is expected to complete a full-length critical essay on a topic decided after discussion with the instructor. Through-out the semester students will bring samples of their writing in class and will get feedback from the instructor and from their peers.

* Open to the Institute but you must have completed a minimum of one short film or video to be eligible.

F 430: Video Installation: Speaking to the Mind in the Language of the Body

2 units / Semester: II

The objectives of this course are to learn how to work with the moving image and sound in space, and translate ideas from cerebral content to kinesthetic insight and back again. We will contemplate the essential component of video (time), the definitive condition of installation (space), the here-and-nowness of video installation, and experiment with the creating kinesthetic insight and sensation through scale, and the juxtaposition of image and sound. We will study concepts of perception, sensation, space, and duration, and apply it to editing, content, and form. Beginning with an overview of the history and unique properties of video /film installation, the projected image, and multi channel works, we will integrate visceral experience with conceptual content. There are screenings and presentations, reading assignments with written responses, video installation experiments, and each student will produce one sustained installation. Students will learn how to write and present proposals for video projects.

F 446: The Film Essay

3 units / Semester: Not planned for this academic year

This production class will explore the essay-film. Film critic Alexandre Astruc created the term camera-stylo in 1948 to suggest a new means of writing through cinema, in which the camera would serve as a pen, creating arguments, meditation and inquiries. Film essays are neither straight documentaries nor fictional narratives but are usually a hybrid of different forms and tend to be driven by theme rather than plot. Students will make three short videos over the course of the semester that will explore this form. The course will also include screenings of film essays and readings of informal written essays as sources of inspiration and departure. This course is designed for MFA and upper level BFA students.

F 447: Art and Ethnography

3 units / Semester: Not planned for this academic year

What exactly is 'ethnography'? Even anthropologists argue among themselves about what is and is not ethnographic,

especially when it comes to media. Ethnographic film practice used to mean making a non-fiction film through participant observation, and communicating that locally gathered knowledge about that culture. But cultures are in fact neither discrete nor isolable from one another, and over the last generation, anthropologists have also 'come home' to study their own cultures. If anthropologists have traditionally sought to render the unfamiliar familiar, this complementary endeavor poses a reciprocal provocation: to render the apparently familiar strange, and to allow us to engage with it anew, to apprehend it with fresh eyes or ears. This course will look at key moments in the history of ethnographic film as well as consider contemporary creative responses to that history with an emphasis on the work of Jean Rouch. The films in this course are not made exclusively by anthropologists -in fact many were not made self-consciously as ethnographic documents. The films are highly varied in approach and in intention but they all seek to represent the diversity of lived experience. In this class we will look at what the debates around ethnographic film in anthropology have to offer a wider range of media practices, and what we as mediamakers have to offer to the debates ourselves.

F 456: Listening/Seeing

4 units / Semester: Not planned for this academic year

Each week a different location (either urban, rural, or wilderness) will be visited for the purposes of listening and seeing. At the end of the visit the class will meet within the location to discuss what each has individually experienced. Attention will be given to how the experiences of listening and looking can translate into the making of images and sound. A written journal is required to document what has been heard and seen, and each student will be required to do extensive research on one of the locations visited. Some of the specific sites are: an oil field, emergency hospital waiting room, Death Valley, the Los Angeles Port in Long Beach, San Fernando Road, and 29 Palms military base.

F 522E: Graduate Seminar: Film and Politics

3 units / Semester: Not planned for this academic year

Mao Tse-tung once said, 'Not being politically correct is like having no soul.' In a society that values 'political incorrectness' above all—even after the irony that briefly invigorated that phrase has completely vanished—it may be hard to understand what he had in mind, but we will propose that the recent revival of political film-making, particularly in documentaries intended for theatrical release, has suffered from both a lack of political correctness and a lack of soul. That is, these films lack a utopian vision, an ideal of a better social order and a sense of how it might come about. So a bit of political theory is necessary. And a bit of history. How did conservatism turn into neoliberalism? How did utopian socialism turn into scientific socialism? We can blame Karl Marx for the latter transformation, but we need to consider what can be saved from this mode of thinking Marx was so eager to jettison. More concretely, the course will explore the relations between journalism and film-making, beginning from Kieslowski's theory of description: it is necessary to describe what has not yet been described or acknowledged because without description, it doesn't officially exist and thus we can't refer to it, we can't speculate about it, and we can't alter it. This necessity applies to ideas as well as to situations. Written texts will include Kieslowski on Kieslowski, *The Need for Roots* by Simone Weil, *The Cultural Front* by Michael Denning, *To the Finland Station* by Edmund Wilson, and *The Coast of Utopia* by Tom Stoppard. Screenings will include works by Kieslowski, Emile de Antonio, Jon Jost, Jean-Luc Godard, Chris Marker, and Adam Curtis.

* Approved for Critical Studies credit for upper level undergraduates.

F 522F: Graduate Seminar: Artist and the Archive

3 units / Semester: II

In this course we will consider the archive as a repository for cultural and historical artifacts. We will also explore the archive as a conceptual framework for thinking about the historical record. How have artists used, created and disrupted actual archives? How have they been inspired by the idea of the archive? Can we think of the internet as a kind of boundless archive? Can we think of film itself as an archive? Emphasis will be on film and video, but we will also look at artists' projects across a wide range of media. Coursework will include readings, screenings and 2 field trips to LA area archives. Students will be asked to produce a creative final project in response to the issues raised in the seminar.

FC240B: Color and Design II: Machine, Diorama, Cabinet of Curiosity:2013

2 units / Semester: II

COLOR AND DESIGN II is a hands-on inquiry into more advanced components of visual language, composition and color, by means of lectures, audio-visual presentations, studio projects, and critiques. Here you will explore the relationship between form, process, perception and intention. Work will include a deeper study and a practical use of the basic elements and principles of design as they pertain to art making in general, issues of time-based work, and work in a 3-D format. The course work is structured around a series of projects that are designed to expand your present artistic considerations and borders, with an emphasis that comes from the semester's theme of Machines, Dioramas, and Cabinets of Curiosity.

First priority is given to students in Character Animation, Experimental Animation, and Film/Video; however, students from all quadrants of the Institute are invited to attend as space allows. LIMITED ENROLLMENT. By permission of instructor.

FC275B: Art Appreciation: Site Visits: Museums, Galleries, Events

3 units / Semester: II

(First priority given to students in Character Animation, Experimental Animation, and Film/Video; but participants from all areas of the Institute are welcomed; limited enrollment by permission of the instructor ONLY.)

This Critical Studies class is designed to provide first hand experience of the art object for the participant through visits to the various museums, art galleries, private studios, and art events happening in the Los Angeles metropolitan area. This is also a way to begin to generate ideas for potential new work.

The initial meetings will lay out a time-line of the off-campus visits, and establish a working transportation schedule. We will do our very best as a group to figure out a shared transportation plan for getting to these off-campus sites. However, each person is ultimately responsible for his/her own transportation, costs of transportation, and any entrance fees. In preparation of these visits, students will explore ways to speak about the viewing of art, investigate some of the literature about aesthetic questioning, and have readings on art-making written by artists themselves; expect several writing assignments to parallel these parameters.

Vital to the core of this class is the on-going creation of a personal sketchbook/s by each artist, used to 'journal' each visit. Grades will be based on the contribution one makes to the overall conversation of our visits, completed sketchbook/s, and several papers.

FC317: Comics as Graphic Art: A Historical Review

3 units / Semester: Not planned for this academic year

This course will offer an introductory tour through 100 years of newspaper comic strips and comic books. Classes will focus on the chronology of the medium: its graphic precursors from the middle ages to the pioneers of 19th century; its early days as an original form, first as newspaper strip, then as commercial comic book; its post-War boom; the rise of Underground Comix in the late 1960's; RAW and the international adult comics in the 1980's; and the recent emergence of artistically ambitious book-length graphic storytellers. This is not a course that will largely focus on super heroes. Three short papers will be due during the semester. Each will critique an artist covered in class. Students will be asked to spend \$52 on one book and reproduced artwork.

* Open to the Institute.

SPRING 2013 This is a course designed for students who have a basic foundation in digital editing practices and want to translate their existing skills into Avid Media Composer. Through lecture, demonstration, and assigned projects, we will cover Avid digital editing workflow, basic and intermediate editing techniques, as well as explore strategies and aesthetics of editing in narrative, documentary and experimental forms.

FALL 2012 Basic editing and digital workflow essentials from transcoding to Blu-ray authoring. Learn, or improve your knowledge of, fundamental software such as Avid Media Composer and Encore.

- * Limited to FDP students, required for video editing room(s) access.
- * SPRING 2013 Highly recommended for FDP MFA2 & MFA3 students
- * Permission of instructor required.

FD504: FDP Acting Workshop 1 and 2

2 units / Semester: I, II

An in-depth investigation of the acting process through exercises using improvisation, prepared scene work, and some acting for the camera. This class takes an in-depth approach to the creation of a true and credible performance. Work will focus on how to develop a character through text analysis, research methodologies, and the exploration of human behavior through dynamic action and intention. This class builds on fundamentals established in beginning acting courses bringing the artist to a deeper appreciation of how to use this delicate craft in achieving true and honest storytelling. Recommended highly for artists across all disciplines.

Semester I (Acting Workshop 1, Required of all FDP MFA 1s as part of the Dramatic Construction, Performance Core), Semester II (Acting Workshop 2 open to all FDP MFA 2s/3s and to the Institute by permission of the Instructor)

- * Permission of instructor required.
- * Cross disciplinary class.
- * Open to the Institute.

FD512A: Scene Study

3 units / Semester: I, II

The collaborative work between an actor and director is critical to dramatic narrative storytelling. Many essential fundamentals are shared between the two disciplines including, but not limited to, basic story/text analysis, research skills, the art of rehearsal, and a shared vocabulary centered on action-intention. Students will participate as both actors and directors throughout the course of the workshop; fundamentals will be developed through scene work both improvised and scripted, and by breaking down material on paper, on stage and through critical analysis of film clips. Performance in class work encourages the director to challenge their vulnerability and willingness to risk. Scene study teaches the director to evaluate the events materializing in front of them and make effective adjustments to the scene while working on the floor.

- * Required: All FDP MFA 1s (Fall semester as part of Dramatic Construction, Performance Core, Spring as FD512B Scene Study)
- * FD512B Open to the Institute in Spring semester
- * FD512B Permission of instructor required.
- * Permission of instructor required.

FD512C: Advanced Scene Study

3 units / Semester: Not planned for this academic year

Building on the foundations of FD512A&B Scene Study, this advanced workshop focuses on the synthesis of elements used to construct dramatic narrative, including text analysis, performance, design and staging. Students will develop scenes in class by deeply investigating story construction, questions of performance concept and style, rehearsal techniques and collaboration with actors and designers. Material will include published as well as original texts, and emphasis is on crafting specific moments and beats within the scene.

- * Prerequisite: FD512A&B, or equivalent.
- * Can be used towards fulfillment of the metier course OR the special topics requirements for FDP MFA-2 and MFA-3 students.

FD516: One Act to Cinematic Event

2 units / Semester: I, II

Working in the live performance-theatrical medium contributes to the film director's exploration of storytelling with rigorous attention to text analysis and casting. This course offers directors opportunities to collaborate with artists across disciplines including actors, and possibly puppeteers, designers, musicians, and dance/movement. Each director will explore the intricate relationship between actors, space and text by helming a ten to fifteen minute play or section of a play, presented in a short run of public performances. Plays will be chosen with a specific theme determined by the instructors and students to coalesce the presentation. At the end of the semester, the plays will be adapted into a cinematic treatment or step outline. Students are encouraged to film the adaptation, although not required.

- * Can be used towards fulfillment of the metier course OR the special topics requirements for FDP MFA-2 and MFA-3 students.
- * Permission of instructor required.

FD517A: Special Topics: Realist Style

3 units / Semester: Not planned for this academic year

An investigation into the formal means that narrative filmmakers (from the Italian neo-realists to Dogme'95, Renoir to Cassavetes) have used to achieve a heightened sense of reality in their work. Topics include the incorporation of documentary technique into fictional films, 'improvisation,' performance styles and the relationship between these 'naturalist' filmmakers and the mainstream cinema. The class consists of a lecture/discussion and a screening each week. Students are required to present a one hour seminar based on a 15 to 20 page paper or a short original film.

FD517B: FDP Special Topics: Fact, Fake, Fiction - Autobiography in Narrative

3 units / Semester: Not planned for this academic year

This is a critical examination of first-person films drawn from personal experience, literature and history, as well as a practicum for students' own autobiographical work. We will be concerned with a wide variety of autobiographical sources including memoir, testimony, diary and historical record as we consider strategies for using one's own experience to tell cinematic stories. Works considered will be fictional, documentary, personal and hybrids of these, and will offer an opportunity to trace the shifting qualities of a story as it travels from one form to another, and raises questions of reference, location, time, audience, structure and authenticity. Students will complete several short video sketches and a final project consisting of a research paper or autobiographical work.

- * Limited enrollment by permission of the instructor.

FD517E: Special Topics: Experiments in Narrative

3 units / Semester: Not planned for this academic year

This course asks to examine and challenge the function of narrative conventions, bridging the gap from the experimental or avant garde, looking specifically at the politics of narrative's ability to question identity, reality, representation, and history. Ideas range from a discussion of classic, single channel narrative film to a contemplation of the uses of film narrative within installation and video art. Assignments include a short comparison paper, and either a 10 page research paper or a substantial artistic work.

- * Can be used towards fulfillment of the mTtier course OR the special topics requirements for FDP MFA2 and MFA3 students.
- * Cross disciplinary class.
- * Open to the Institute.

FD517F: Special Topics: History/Narrative/Film

3 units / Semester: Not planned for this academic year

A practical analysis and methodologies course for the development of work based upon past events, or what some might call history. The writing of history in many ways mirrors the aims of dramatic film; the way events, document, archive, experience are constructed reveals similar questions of reality, authorship, subjectivity, and position. The course will examine the way that film grammar and narrative structure affects our understanding of past events. Through a survey of various works in the hopes of beginning to understand how form can sculpt an awareness of the often dichotomous phenomena and events in both cultural and personal memory. Films will range from classical dramatic features to more radical filmic gestures and movements. The aim of the seminar is both creative and analytic, the work of analysis ultimately feeding into the understanding and implementation of new models of storytelling and depiction.

- * Can be used towards fulfillment of the mTier course OR the special topics requirements for FDP MFA2 and MFA3 students.
- * Cross disciplinary class.
- * Open to the Institute.

FD517G: Special Topics: History and Practice of Performance in Film

3 units / Semester: II

A study of the development of acting and performance, as it feeds into concepts of presentational aesthetics in film. It is both a practical and analytic class, with the hope that analysis of 'normalized' practices might expand into new processes for creating work.

Specifically, we will examine the particulars of the methodologies directors bring to their work with actors, and the way that these processes manifest on the screen. These will range from improvisational and ensemble methodologies as embodied by Mike Leigh, Shirley Clarke or Fassbinder, to the complicate social dynamics embodied in the works of Otto Preminger.

The scope of the class would move from the idea of performance of everyday life and the study of the ontology of the photographic image into the history of gestural and ritual performance, or the roots of performance practice, and its evolution into more contemporary modes of acting. Paralleling this will be a discussion of the development of will and psychology that feed into the changes in aesthetics of acting, from a shift away from mask and ritual performance, into the emergence of the idea of the individual, as seen first in Edwardian theater practice, and then refined and problematized in the 20th century, by theorists and directors ranging from Meyerhold and Stanislavski to Artaud, Brecht, and Grotowski, within the context of shifting ideas of identity and the specifics of the political climate of the early part of the 20th century.

Behind this discussion will be a contemplation of the political ramifications of these styles, and their uses in maintaining or destabilizing the status quo.

These ideas are to be applied specifically to contemporary film practice, looking at the ways that they manifest within a filmic event, and affect and incorporate within the formal and emotional textures of the work. We will be looking at different exercises and methods used by various practitioners, to give the participants a glimpse into different methodologies and ways of working with actors. We will also examine some of the specific relationships formed between actors and directors, and the politics of this dynamic.

Each section of the class will revolve around film assignments that incorporate the ideas discussed in class. There will be a few short assignments based around the exercises and reading, culminating in a final film.

- * Can be used towards fulfillment of the mTier course OR the special topics requirements for FDP MFA2 and MFA3 students.
- * Cross disciplinary class.
- * Open to the Institute.

FD517R: Special Topics: Rock & Roll and Movies

3 units / Semester: I

Rock & Roll & Movies is a history of Popular Music from 1955 to the present, as seen through its representation in cinema. We will see key works in the history of Rock & Roll movies and read a number of the important critical texts on the music. Issues covered will include the role of race and class in popular music, the paradox of 'radical' culture distributed through corporate capital, amateurism, 'authenticity' as a cultural value, and the interplay of history and pop culture.

- * Approved for Critical Studies credit.

- * Permission of instructor required.
- * Cross disciplinary class.
- * Open to the Institute.

FD517S: Special Topics: Coming of Age Stories

3 units / Semester: II

This course proposes a broad reading of the coming of age story, framing it not just as a specific moment of adolescent development, but as a narrative of personal transformation most often concerned with transgression and epiphany. Through an examination of classic, independent and avant-garde examples of this vast genre, we will investigate thematic questions of sex and sexuality, the body, spiritual awakening, ethics, race gender, nationality and community, autobiography, anger and violence. We will also be concerned with a range of production concerns that arise in the making of such films, such as working with child actors, staging sex scenes, visual and dramatic treatments of rites of passage, and the presence of nostalgia and episodic structure in writing coming of age stories. Assignments include several short personal writings or cinematic essays, and either a one-hour seminar based on a germane topic or a substantial, relevant artistic work.

FD520A: Narrative Fundamentals

2 units / Semester: I, II

Narrative Fundamentals. Form and function are intricately embedded within each other, the way you make images affects the meaning of those images. These lectures will draw on the practical ideas introduced in your production classes, and ask you to interrogate your assumptions about construction of events in time, and the making of images and meaning. Practical lectures will be accompanied by assignments that ask you to use the camera as a tool, looking at the ways you go about constructing images through time and space. It is meant to question such basic assumptions as 'cinema' and 'narrative', while developing an understanding of the material and language of both. Assignments will include both practical shooting and staging assignments, which examine the description of event using the language of the camera, as well as exercises in film analysis and examination of director methodology.

- * Required of all MFA1 Film Directing Program students.

Discipline(s): [School of Film/Video](#)

FD523: Finding Your Story

2 units / Semester: I

Exercises and lectures designed to discover sources, processes and methodologies that lead to the development of story ideas and scripted dramatic events. Treatments, step outlines and short scripts will be crafted by the students from a variety of inspirations including, but not limited to, publications, literature, diary and journal work, observations of public spaces and events. Many of these pieces will be workshopped in the class setting and may form the basis for future CalArts projects. Emphasis is given to clear, effective storytelling and the ability to articulate cogent critique of class presentations.

* Required of all MFA 1 Film Directing Program students as part of the Dramatic Construction, Performance Core.

FD605A: HOLY LAND: adaptation from memoir to cinematic event

3 units / Semester: I, II

Development of D.J. Waldie's visionary history and memoir of Lakewood, California, 'Holy Land: A Suburban Memoir,' into a feature length film comprised of several chapters directed by an ensemble of filmmaking students. Each section will represent a diverse cinematic approach or modality aesthetically coalesced under the tutelage of James Franco. Students will be expected to conduct extensive research into the memoir's period (1950s) and place (Lakewood, California) exploring the rise of the aerospace boom and insidious spread of prototypical suburban 'utopias'. The research will contribute to a common visual language and context for the story beats. Shooting exercises might include landscape work and scene study with actors to discover performance styles/s suited to the project. While questioning the veracity of memory, the adaptation of 'HOLY LAND' will illustrate a period of California history that resonates contemporaneously, projected on a landscape of personal work expressed within a filmmaking collective.

FE107A: BFA Foundation in Animation

6 units / Semester: I, II

BFA foundation students will learn the fundamentals of making animated films in a hands-on workshop environment where we are actively creating during every class meeting. This course will serve as a beginning underlayment for further study in Experimental Animation. The foundation class will include drawing sequential motion using pencil and paper, covering all aspects of progressive movement, especially the laying out of ideas through time. We will work on character design, concept development, storyboarding, and production pathways. In addition we will learn some of the experimental animation techniques through making short pieces using cut-outs, found images, photographs, and paint-on-glass. The course will cover basic design techniques and considerations including materials, execution, and color. We will also have a foundation study of contemporary art history and the history of experimental animation viewing slides and videos. Students are required to provide their own pegboards and lights and additional art materials. The course meets twice a week (Tuesday and Thursday)

* Meets twice a week.

* Required of all incoming BFA Experimental Animation students.

FE235: Drawn Techniques for Experimental

3 units / Semester: I

Each week we will take on a particular exercise to gain expertise in the skill of drawn animation with a rigor to hold on to the personal. We aim to gain control over image movement that is dynamic whether it be political, surreal, abstract, memoir driven or humorous. Drawing workshops will yield possibilities for short narratives. Workshops will yield key drawings to be explored in animation as exercises are fundamental to learning animation. Screenings, critiques and demonstrations parallel viewings of student work.

* Required of MFA1 Experimental Animation students.

* Cross disciplinary class.

* Open to the Institute.

FE236: Experimental Animation: Direct Techniques Extended

3 units / Semester: II

CalArts, School of Film/Video

'Anyone who hears butterflies laughing knows how clouds smell'. (Novalis)

Visual thinking plays a central role in creativity for most creative people. The ability to imagine pictures is inseparably bound up with one's sense of fantasy, and daydreams are often used as a kind of platform to launch new and creative ideas.

The focus of this course is to increase the imaginary power of our mind by a variety of exercises that will result in animations utilizing different 'direct techniques'.

Understanding structures, light and shade, color, surfaces and perspectives, as well as the combination of different techniques and styles will be a crucial part of challenging the conventional view.

Exercises in small groups, presentations and discussions in class will encourage students to explore their imaginations, creating new things, allowing them to see what was previously hidden from them.

Methodology

The course will start with a series of exercises to create a common understanding of the meaning 'imagining'. These exercises will include all five senses and be continued over the entire semester, to train their ability to see, to memorize, and to enhance their visual thinking. Students will ask to collect materials in nature, take photos of buildings, disassemble objects and create something new out of them, which will be the base for an animation.

Assignments will be presented and discussed regularly.

This course includes treating transparent and black 16mm leader in a broad variety of methods, including drawing, painting, scratching and boiling; as well as pixilation, rayographs, sand animation, painting on glass, and cut outs.

Practice using both conscious and subconscious states of mind.

Assignments

There will be six short assignments and one final assignment creating one at least one minute long film using a combination of different techniques that have been practiced during the course. Collaborations where appropriate are highly encouraged.

To pass this course successfully students have to participate in discussions actively, as well as providing five assignments; the last assignment is mandatory to pass; missing more than three classes unexcused will result in a NX.

Limited to 12 students, required for BFA3 Experimental Animation students.

The remaining places are open for students of all programs, basic knowledge in digitizing and editing are required.

- * Recommended 1st year MFA Experimental Animation students.

FE237: Just Do It

3 units / Semester: I

Just do it! Experiment with different materials: find them, treat them, combine them, and discover the beauty of most likely surprising results! We work with film and digital media and explore the comprehensive possibilities in combining both. Frequent discussions about your work and about work of renowned artists will broaden your understanding and appreciation of experimental work, and improve your ability to criticize your and other's work.

- * Recommended for MFA1 and MFA2 Experimental Animation students.
- * Enrollment limited to 12, by permission of instructor.

FE245: Abstract Animation

3 units / Semester: Not planned for this academic year

This course is a framework and workshop for creating content in the non-objective language of the abstract animated film. Students will explore the nature of the organic, the mechanical, the architectural, the ephemeral, and the unknown. Through exercises in painting, drawing, and inking students will explore their own personal visual vocabulary through images moving in time. There will be a lot of emphasis on color, line, texture, and rhythm in the animation as well as basic painting technique. We will make several short animated works, with or without sound. We will emphasize the conceptual in the abstract image as opposed to visual entertainment-searching for meaning and recognition in the abstract. We will look at abstract works by contemporary filmmakers Jeff Scher and David Ehrich, as well as classic films by Oscar Fischinger, Jordan Belson, Len Lye, and Viking Eggeling. Students will need watercolors, gouache or acrylics, pens, brushes, and inks.

FE295-CS: Cameraless Filmmaking

3 units / Semester: Not planned for this academic year

This course explores the history and aesthetics of films made directly on a filmstrip, without the use of a camera. Course readings and discussions focus on direct cinema as a form of alternative expression within artistic, social, political and theoretical contexts. The course begins with discussion of small-scale art in optical toys as well as related art forms, and then focuses in-depth on direct cinema filmmakers. Course requirements include a journal, production of a thaumatrope and flipbook, a short direct film project and three papers covering: methods used in the direct film, a direct filmmaker discussed in class and a personal manifesto. No previous filmmaking experience required.

FE303: Alternative Stop Motion Techniques

2 units / Semester: I, II

This multidisciplinary course engages all disciplines in collaborative animation projects using frame-by-frame pixilation as a springboard to further develop interests in multimedia performances and/or the creation of stop motion pixilation performances. Students are encouraged to take alternative directions and break boundaries within their area of specialization. Possibilities include merging screen-based work with stage performances, animating life-sized puppets in real world environments, and/or choreographing dance formations using pixilation. Through lectures, screenings, and ample production time, students study the magic behind pixilation techniques, dissecting the process in order to help

them create unique theatrical visualizations. The history of cinematic special effects and early trick films will also be studied.

FE314: The Art of Intuition

2 units / Semester: I

This course is aimed at enhancing and building creative instincts toward the making of new original works. In this course we will strive to place ourselves in positions of not knowing where our curiosity will take us. Instead of viewing historical works in animation for reference and inspiration, we will instead throughout the course screen several experimental live action and found footage non-animation films and videos, examining in particular the conceptual and intuitive construction of avant-garde works past and present in an effort to expand the students' awareness of montage, poetic assembly, sound and image constructs, and the overall impressions and meanings these films convey. We will produce sequences which may include photographs, found footage, drawing under the camera, cut-outs, objects, perhaps 16mm, stream of consciousness writing, and other experimental techniques which seem appropriate to each filmmaker's interest. Audio elements will be an ongoing part of the class: signals, sounds, audio conflicts to the message, voices, instruments, textures, and so forth. Students will be encouraged to work with mediums and conceptual ideas which seem foreign and untried. Projects will be aimed at each student finding their way in the wilderness of possibility. We will strive to create short sequences which are not 'finished' but instead are truly experiments.

 * Open to those students who have access to E21 and/or A115HI and have reasonable expertise in an editing and/or compositing software such as Final Cut Pro or After Effects.

FE316: Screenwriting: From Image to Story

3 units / Semester: Not planned for this academic year

A workshop open to all levels-- beginning to advanced, in which students propose, outline and complete a first draft of an original or adapted short screenplay (15 pages). In-class presentations and discussion of in progress drafts is required. Screenplays can be narrative, experimental or anything in between. Emphasis will be given to each student's particular needs and sensibility as well as general formal concerns such as story construction, formatting and dialogue. The syllabus has been designed to be particularly helpful to experimental animation students (MFA 2's, BFA 3's) as they formulate their thesis projects. Students are asked to purchase Final Draft screenwriting software and have Internet access to email their assignments.

* Recommended for MFA 2 and BFA 3 Experimental Animation Students

3 units / Semester: Not planned for this academic year

Experiments with different materials and medias will be brought to a high level in this course. When is it appropriate to apply them, how can I utilize them in a meaningful manner and which message do they provide? Topics of this course will be working with rhythm, working with juxtaposition of different materials and medias, and understanding perception. Frequent presentation of your work and work of others will be accompanied by a critical discussion: what do we perceive, why do we perceive it this way, and what influences our perception?

- * Highly recommended of BFA2 Experimental Animation students.

FE333: History of Experimental Animation

3 units / Semester: I

The question for this class will be 'what is experimental animation?'. The emphasis will be on contemporary practices with the discussion framed within concepts and developments in film theory, art history, animation and cultural studies. We will look at traditions of artists' films; the avant-garde; the relationship between the fine art world and animation, including installations; art house cinema, auteur theory and animation; the high art/popular culture debate; and theories of modernism, post-modernism, and the computer age. Students will be expected to purchase a University Reader for the class at a cost of up to \$50.

3 units / Semester: I, II

The Thesis Concept Seminar analyzes and supports the student's thesis project while it goes through preliminary phases to prepare for the thesis review. The MFA student spends a fair amount of time preparing this project with at least two presentations before the class and one before the Thesis Review Committee. Critiques, writing exercises, modes of visual presentation and screenings are vital parts of this class. The discussions that develop and evolve within the class are critical as visual presentations and written treatments are quite diverse. A review of the stages the project passes through and graduation guidelines are covered as well in the class.

FE338: Introduction to 3D Computer Graphic Animation

3 units / Semester: I, II

This course, offered in the fall and spring, will introduce the essential processes and concepts of 3D CG. Personal exploration and experimentation will enable both dedicated animators as well as students from across the institute to engage 3D CG energetically. Akin to rapid prototyping in a sandbox, students will discover entry points through which 3D CG can contribute to and enhance their current artistic practice. In fall, students will be taken directly into animation,

learning a wide variety of techniques including dynamic, keyframe and procedural animation, then through a series of experiments aimed at exposing the fundamental underbelly of CG and finally on to personally driven 'play-jects'. In spring, students will broaden and deepen this foundation through both brief potent technical projects and personally driven work.

FE347: Documentary Animation

3 units / Semester: Not planned for this academic year

This is a one semester course designed to develop animation projects, which draw from social, political, environmental, historical, cultural, or other phenomena as the basis for works in animation. We will view and discuss animated films, which represent this small 'genre', as well as films, which exemplify creative approaches from the contemporary documentary field (verite, hybrid, reportage, etc.). Through research (newspapers, internet, library) and onsite visits to interesting places which might provide ideas for documentary animation, students will conceive multiple possibilities for animated documentaries and choose one project to develop through completion as an outline, treatment, and storyboard.

FE365: Graphic Short Story

3 units / Semester: Not planned for this academic year

This one semester course is designed to explore the visual possibilities of the frame in the context of conceptual expression in animation. We will look at the comic book, the graphic novel, the animation storyboard and cartoons and experimental animation; studying the framing, color, style and design. We will experiment with various means of creative development including research, day-dreaming, the psychology of figuration, and in general 'thinking outside of the box' when dreaming up ideas for animation. Each student will create a finished 'graphic short story' a printed realization of an idea, situation, story or simply a series of events emphasizing the development of personal style, color, design, framing and production value. This course is designed to exercise the possibilities.

FE408: Voice and Text: A Mosaic

3 units / Semester: I

This class is designed to realize how writing with the voice in mind is an instrument for writing. Each class is a workshop with different approaches using original writing for recording and performing. Listening to radio plays, the news, film narration, conversation-as-text, and other formats will be part of an ongoing investigation to address the structural components of what makes a good voice-over and how writing informs that. Acting, whether dramatic or minimal, will be developed in conjunction with performers from other practices in order to appreciate how collaboration may contribute to the fullest realization of the workshop investigations undertaken in this class. Technical devices (microphones, etc.) will be studied to realize how to achieve the desired outcome for voice recording. Although a series of exercises will be developed, a final project accompanied with a text version is expected as a final project. A survey of radio artists and formats, playwriting and performanceart will be discussed and reviewed. Methods for visual presentation with voice will be a continuous thread throughout the course. This class is designed for students in the Experimental Animation Program but is open to the Institute.

FE411: > 100% AE

3 units / Semester: I

Through weekly class lectures/demonstrations, faculty will present practical illustrations, theoretic advantages and expanded creative possibilities to blending After Effects user interface and software control through writing 'Expressions' the built-in accessible and easy means of writing code. While we will explore, edit off the shelf code and write original scripts, much can be done with only one or two lines of AE Expressions code. With Expressions and other tools, we will travel out-of-conventional-pathways, allowing much to become new. A try-it-and-see-what-happens approach will be used (experimentation), with the ongoing goal of creating elements of animation that would not be likely when restricted to the regular manually operated AE interface. Students will try approaches that do not fall within standard animation practice, as a way of discovering what-can-be. Dedication to exploratory fun will be the tone of the course.

FE417: Motion Capture for Artists

2 units / Semester: II

This course will take the form of a series of lectures, screenings, and demonstrations in support of a production workshop centered on using our eight camera PhaseSpace Impulse 3D motion capture system in concert with Autodesk's MotionBuilder and Maya software packages. The goal is to explore the potential of performance animation in extending artists direct physical gestures into expressive animation. In addition to exploring the more conventional uses of motion capture how can we reach beyond these conventions to achieve more innovative work? Some possibilities to be explored will be the incorporation of procedural animation, non-representational imagery, dense layering, and unique remapping of gestures. Students are encouraged to explore areas of personal interest and to incorporate this research into their production work.

FE428: Stop Motion Puppet Design & Fabrication

3 units / Semester: I

Unlike live action filmmaking the 'puppet' actors in a stop motion film need to be designed and constructed by the filmmaker. This class will introduce students to a variety of fabrication techniques and materials both old and new used in building puppets for animated films. Through a series of demonstrations, reference clips and assignments students will learn how different materials can be used to create flexible puppets for varied looks and function. During the process they will begin to understand how the personality of their puppet character guides the choice of the construction technique.

FE429: STORY

3 units / Semester: Not planned for this academic year

This one semester course is designed to explore the possibilities of story structure (not necessarily narrative) and conceptual underlayments for animated films. We will experiment with various methods of personal creative development through research, drawing, observation, and other methods of 'dreaming up' ideas for animation- including studies of various structural forms (the poetic, abstraction, story-telling, humor, and tragedy).

Each student will create a finished 'graphic short story'-a printed realization of an idea, situation, story or simply a series of events-emphasizing the development of personal style, design, framing and conceptual underpinning. This course is designed to exercise the possibilities inherent in open-minded development leading to the eventual creation of a finished work in animation.

FE438: Sound Body of Visions

3 units / Semester: I

This guitar, dance, and digital imaging/compositing workshop provides practice in multi-metier engagement as a means to exploratory experiences leading toward realization of personal INNOVATIVE approaches in motion graphics creation.

Contained in this intermediate-advanced course are a set of activities designed to foster, heighten, and stimulate new directions in unique expressive animation, motion graphics and video. As a means to exercise and strengthen personal innovative art creation, students will participate in weekly group guitar lessons**, intermediate-advanced Adobe Production Suit instruction featuring After Effects with accompanying individual tutoring, and one hour-twice a week fundamental instruction in modern dance. As a result of stimuli experienced through multiple art form practice, new personal creative links between technology and imagination can open, 'independent' thinking can strengthen and expressive art making will emerge. The acts of composing and performing improvised music, personal expressive movement of oneself through space and producing unique motion graphics, is expected to nurture the development of pathways to making powerful innovative art, enhance digital visualization repertoire and technical skills.

* Corequisite: D 001A, Institute Dance I

FE446: Drawing Now: Propositions for the Experimental Animation Process

3 units / Semester: Not planned for this academic year

Drawing is an important and valuable part of the animation filmmaking process and key to developing visual thinking. Skill in realizing ideas through drawing enables students to visualize ideas and to create order and sequence so as to communicate their ideas via media. This class will be a series of specific workshops, which focus on developing skills in drawing movement, sequential thinking, visualizing thoughts, memories, and the potential development of new approaches to drawing. The goal will be to discover how techniques and drawings can spawn and feed off society and the detritus left in its wake. Time; its passing, the traces it leaves, the memory that events, beings and objects leave when we close our eyes on our past is integral to the process. Students will further their understanding of what drawing can become for the animation artist with a broader perspective of spatial cues, mapping a specific experience, questioning the language of drawing and how it brings us closer to what we are trying to say. Written assignments will be regularly given, readings of the state of contemporary drawing, a sketchbook to enable the student to conceptualize ideas. And finally, an exhibit of student works.

For MFA students and upper level BFA students.

FE450: Sound Acquisition for Experimental

2 units / Semester: I

This course that covers the process and technology for recording/acquiring soundtrack elements-effects, voice and music. Will cover techniques used both in the field and studio environment, as well as audio fundamentals. Gives access to non-sync field recorders and microphones. Also begins to cover Pro Tools acquisition and editing.

- * Required of all MFA1 Experimental Animation students.
- * Permission of instructor required.

FE451: Post Production Sound for Experimental Animators (MFA)

2 units / Semester: II

Second part of a two semester required sequence, Using Pro Tools for sound editing and mix preparation. Opportunity to build on and expand recordings from the fall semester. Planning and coordination of Post-production sound paths, including format/finishing considerations. Post recording of effects/music. Graduate students will be expected to complete additional assignments.

- * Required of all MFA1 students
- * Prerequisite FE450

FE455: Photoshop/Premiere/After Effects: Hybrid Imaging (Grad)

2 units / Semester: I

Develop fluent knowledge of creative possibilities embedded in the marriage between contemporary image making instruments, methodologies and concepts. Study of creative digital cinema and animation creation, utilizing current image acquisition possibilities, creation and layering power of Adobe Photoshop, Illustrator and After Effects.

- * Students must attend the first class where they will be given the opportunity to test out.
- * Required for MFA1 students.
- * Permission of instructor required.

FE460: Direction and Performance in Stop Motion

3 units / Semester: II

A key component of a stop motion film is the quality of the animation. The success of a character's performance is not merely defined by its smoothness. The movement must communicate the physical and the emotional state of the character to the audience. This class will focus on the physical process of the 'frame by frame manipulation' of a stop motion character and give students studio time to experiment with poses, timings and pacing. By testing different increment sizes and experimenting with timing and poses, students will obtain animating experience and create a visual vocabulary to improve their artistic expression. Using a clay or wire puppet and animating with Stop Motion Pro, students will receive hands on experience animating and experimenting with movement. Students will be able to test and rehearse performances for their thesis or other projects. to 12 students.

Prerequisite: FE320 Stop Motion Animation Basics

* Permission of instructor required.

FE470: Advanced Stop Motion Production

3 units / Semester: Not planned for this academic year

This is a production course designed to assist students in the production phase of their projects. Focus will be on creative set and puppet construction, specialized lighting, mastery of a high level of performance and timing, and special effects.

* Prior experience in stop motion required with permission of instructor.

* Prerequisite FE360

* Permission of instructor required.

FE495: Risky Hard Driving in After Effects

3 units / Semester: Not planned for this academic year

A mixture of advanced practical and theoretic approaches to structuring, visualizing, methodologies and student presentations will be woven together for experienced students seeking an advance forum on working with contemporary graphic tools. Personal project presentations, discussion and feedback will play a major role in the activities of this course as we seek ways to break through to new, unique, expressive territory in digital media creations. This advanced After Effects course is designed to join diverse student individualism, talent and advanced skill in a series of projects, lectures, demonstrations and discussions around the subject of digital media art making. Students will use After Effects as a tool to metaphorically 'paint outside the lines' and excavate the pure world of hybrid imaging and most importantly take creative risks while making a series of personal projects.

* Prerequisites: FE255 and FE410

* Enrollment limited to 10.

* Permission of instructor required.

FE496: Art Hysterie

3 units / Semester: Not planned for this academic year

This is not your grandmother's art history course. We will explore the unfolding movements of the arts during different periods of the 20th century to the present in the context of the cultural combustion of politics, technology, and the ever-changing definition of 'newness'. We will take a look at and listen to some of the styles and ideas expressed in the work of 'modern' painters, architects, musicians, cartoonists, and filmmakers. Futurism, Art Happenings of the 1970s, Andy Warhol and his films , Pop Art, Installation Art, Digital Art, Performance Art , post-modernist architecture, graphic novels,

documentary and experimental films, experimental music, underground cartoons, Expressionism, Cubism, Dada, Surrealism, Funk Art, Assemblage, and Minimalism will be explored. Projections, recordings, videos, 16mm films and readings will be used to picture and hear the history of modern art. The course will be taught by painter and filmmaker Suzan Pitt. To take this course you must be curious, attentive and open to new ideas: absorb, ponder, question, and learn. There are no papers required. Students will be required to research subjects in art history outside of class and make presentations on this research in class. Art projects relevant to the course material (paintings, music, theater, video, etc.) may be substituted with permission of the instructor.

* Open to the Institute.

FE520: Alternative Approaches 3D CG Animation

2 units / Semester: Not planned for this academic year

This seminar class will take the form of a collaborative workshop with the goal of investigating options to the dominant approaches currently found in our 3D computer graphic animation curriculum (which, by design, mirrors the approaches currently found in the larger world). What are some of the interesting possibilities out on the margins of dominant practice? Some of the topics explored will be algorithmic composition, realtime performance, and nonrepresentational imagery. The specific shape of the course will be determined by the particular motivations of the students participating in it. Students will be encouraged to explore areas of personal interest and to present the results of their research to the class.

* Permission of instructor required.

* Cross disciplinary class.

* Open to the Institute.

FE537: Explorations in Stereoscopic Imaging

2 units / Semester: I

Since 1838 when Charles Wheatstone first formulated a theory of the role of binocular vision in stereopsis, numerous techniques for the creation and display of three dimensional images have been developed. Through a series of lectures, demonstrations, and projects we will explore the theory and practical application of the art of stereoscopy leading from Wheatstone's stereoscope up to current developments in stereographic 3D CGI.

Is there a medium specificity involved in the production of monographic contrasted with stereographic art? How have artists subverted the stereoscopic potential for an increased sense of realism by creating apparently impossible spaces? In what other ways may stereoscopy be used to challenge notions of representation and objectivity? When does the use of stereoscopic imagery appear to be merely a gratuitous gimmick and when does it appear to serve as an integral aspect of an art work? What are the implications for the independent film artist in the expanding adoption of commercial and home theatre 3D stereoscopic exhibition capabilities? These are some of the questions that will be addressed during the course of this class.

- * No prerequisite.
- * Permission of instructor required.
- * Open to the Institute.

FE560: Seminar in Animation History

2 units / Semester: II

Seminar in Animation History is a course for graduate students wishing to develop advanced understanding of animation history and related research. The course includes weekly readings and seminar discussions on a range of topics, in-depth research on a topic of the student's choosing, a resulting 15-20 page paper utilizing multiple sources, a class presentation, and development of writing skills. Course topics include historical research techniques, conference papers and publication strategies, and other graduate-level issues related to writing.

- * Required for MFA1
- * Limited to MFAs in Experimental Animation or with permission of the instructor.

FE610: Interactive & Internet Media: 3DCG Imagery (in conjunction with Integrated Media

3 units / Semester: I

An interactive boot camp, this course provides a foundation for interactive media installation, creation of art-games, and performance. Students will gain experience using Unity3D, a game engine, for creation of interactive environment. No prior programming experience is required. We will look at installation in diverse contexts, including as a kind of 21st Century cabinet of wonder. Introduction to interactive development tools and theories of new media.

- * No prerequisite.

FE620: Interactive Cinema/The Feral Edit

3 units / Semester: Not planned for this academic year

How can a film, animation, or installation look very different? How can it function differently? Using unusual techniques and creating new approaches to interactive film, media, and animation, we will look at and generate film edits from a body-centric approach. When is the process of editing so odd that it is not considered editing, but something else? Very different edits, and thus, different content will result from a deep reexamination and brainstorming of what-editing-can-be within live action and animated filmmaking and installation. Tools used will include the top level retiming facility from Foundry Furnace, optical flow and DIY editing frameworks. We will explore muscular reshooting techniques, combining projection and live action. What you make will be different than what you've made before. You can use your own footage, found footage, or newly generated footage. Short experiments will result in a serious, intentional project.

FE621: Intermediate Interactive: 3DCG and Projects

2 units / Semester: Not planned for this academic year

This semester, we will take a workshop approach, in which students complete work of their choosing in a workshop environment. Work may be installations, art games, performances with cinematic or other elements, event-based work, or film or animation. Emphasis will be on a single project to be completed by the end of spring semester. Previous experience in 3DCG or interactivity helpful but not required.

- * No Prerequisite.

ID001-01: Fundamental English for Artists BFA

2 units / Semester: I, II

This course is designed to help undergraduate non-native English speakers develop general communicative competence and fluency in classroom discourse and improve grammar and vocabulary skills. Students will concentrate on speaking, listening, and comprehension skills, especially in regard to critique, so they can better integrate into the classroom dynamics at CalArts. Cultural adjustment and social integration issues, as well as communication issues with teachers and classmates will be addressed. Activities will develop skills in listening, speaking, reading and writing.

This course is designed to serve as a prerequisite for CS005A&B Supplemental English for Artists.

ID395: A Comparative Study of Cultural Influences on Art Making

2 units / Semester: I, II

This course will be a cross-cultural comparative study of how an artist is inspired and influenced and what societal elements affect their art making. By comparing culture, ethnicity, and generation, students will examine what factors shape one's values and aesthetics from childhood on. The class will begin as an introspective examination of artistic influences on an individual and lead to defining what represents the generation of today by finding commonalities. In the second half of the class, through the use of telepresence technology, the class will be connected to the Seoul Institute of the Arts in Korea. Students from both institutes will present to each other examples of art and culture that have shaped themselves as individuals and artists. Identical exercises will be given and by comparing and analyzing the work, the class will be able to determine the differences and similarities of interpretation and expression of two cultures.

* Cross disciplinary class.

* Open to the Institute.

ID530: Toward Interdisciplinary Critique: a Survey of Methodologies

3 units / Semester: Not planned for this academic year

A three-hour seminar, open to graduate students and upper-level undergraduate students by permission of instructors. Team-taught by Sara Roberts and Mona Heinze, in conjunction with 8 guests (5 from the Institute, 3 from outside CalArts). In some critiques there is a moderator; participants can say what they want as long as it is their turn. Other critiques stipulate the form of the contribution (it has to be phrased as a question) or circumscribe the content (name what you see without positives and negatives). There is critique that dispenses with words, using the body as the tool for communication; and there is the masked man who ridicules the work until the artist breaks down. There are as many

critical modalities as kinds of fish. This class is not a critique, but a meta-critique, an exploration of forms, frameworks and ideas for the critical process. Each week, with a guest instructor, we will use a different critique. We will examine and critique the critical process, with the goal of a) fully engaging in critical conversation (whether as responder or creator), b) gaining a deeper understanding of how we function as critics-our values and prejudices, and c) developing a critical voice that is informed, expressive, and precise.

* Cross disciplinary class.

* Open to the Institute.

T 062: Flixus

2 units / Semester: II

Flixus is a collaborative effort with the Film school in which students from both schools join forces to create two or three dramatic short films. Students will form production teams with roles matching their areas of concentration, to complement those of the film school students, as well as gaining experience and contributing in other areas. The emphasis will be on cooperation and learning from each other's expertise; the process will be as important as the results. A good introduction to the ins and outs of low budget filmmaking.
